Verifier Plus™ BGA/SMT X-Ray Inspection System

New low-cost, high-quality addition to the FocalSpot Verifier Series

San Diego, California (April 19, 2007) – FocalSpot, Inc. (www.focalspot.com), a premiere provider of advanced BGA/SMT inspection and rework solutions to the electronic manufacturing industry, announced today the Verifier Plus X-Ray Inspection System, a mid-point addition to the Verifier Series of Portable X-Ray Inspection Systems.

The Verifier Plus is designed to provide high-quality imaging and inspection capabilities at an aggressively low price. Although the Verifier Plus is considered to be a mid-entry point system, it offers imaging and diagnostic abilities that rival many high-end systems costing several times as much.

The role of the Verifier Plus is to provide fast, intuitive manufacturing quality assessment and defect detection. The Verifier Plus has a large 40mm Field-of-View for swift inspection of large board areas or components and provides >200X magnification for detailed viewing of the smallest BGA/SMT electrical interconnections. The system is Ideal for BGA/SMT solder quality assessment and low-density material analysis applications.

X-ray inspection has become an indispensable tool for providing quality assessment and manufacturing process information. It is for this reason that x-ray inspection has become a process requirement by the vast majority of electronics manufacturers today, said "Glenn Olaes" X-Ray Product Manager for FocalSpot Inc. Therefore, having in-house x-ray inspection capabilities has become a competitive advantage. The Verifier Plus provides an ideal solution by offering just the right mix of high-quality capabilities and affordability to fulfill both application and budget requirements; making this a practical solution for any thrifty buyer, continued "Mr. Olaes".

Verifier Plus™ X-Ray Inspection System details and specifications can be found at: <http://www.focalspot.com/verifier-plus.htm>.

About FocalSpot, Inc.

FocalSpot, Inc. designs, manufactures and markets affordable high quality x-ray inspection systems worldwide and distributes DEN-ON advanced BGA semi-automated rework solutions and Optilia BGA/SMT Inspection microscopes in North/South America, Canada and Mexico.

FocalSpot also sells, reconditions and supports pre-owned Nicolet X-Ray Inspection systems; providing ongoing service, parts, installation and training. With over 18 years of experience, our team of certified technical support specialists and applications engineers deliver outstanding service worldwide.
